Case IH has released a new cornhead chopping front, which is now available at all O’Connors dealerships. In Corowa we have tested the stubble management of the front in a 14t corn crop. You can easily see the difference of length of standing and chopped canes. Most convincing was the result after the stubbles were burnt. And best of all, same speed and horsepower was used!

QUICK FACTS
- CORNHEAD CHOPPING FRONT
- 14T CORN CROP
- SAME SPEED
- SAME HORSEPOWER
- CLEAR RESULT: CONVINCING IMPROVEMENT

In action: new Case IH cornhead chopping front

Comparison of chopping and common front

Non-chopped stubbles after burn
